

Information Request DTE-1-3

Referring to Exhibit 4, please provide, if applicable, any updates to the RCS Coalition Action Plan since June 2001.

Response

There have not been any amendments or updates to the RCS Coalition Action Plan since it was originally submitted to the Division of Energy Resources (“DOER”) in June 2001. However, in an effort to increase customer participation levels and the penetration rates of major energy efficiency measure installations, NSTAR Electric proposed a modification to the RCS Program in a letter to the DOER dated April 10, 2002. In its letter, NSTAR Electric sought DOER’s approval to raise the customer incentive level for the installation of major measures from 33 percent to 50 percent and also to raise the corresponding cap level from \$500 to \$1000. The proposal and DOER’s approval letter (dated April 16, 2002) are provided as Exhibits 6A and 6B respectively in the Company’s November 1, 2002 CY03 RCS Program Budget filing.

Please note, for program consistency purposes, NSTAR notified the other electric utility program administrators of its proposed changes and other program administrators submitted similar requests.
